Area	13,500 square feet
Cost	US\$ 15 M for construction
	US\$ 3.2 M for equipment
Inauguration	November 2008

Access Showroom is comprised within the Aliante Station 662 M \$ Hotel-Casino project. Scéno Plus was asked to design the architectural concept and technical infrastructures of a multipurpose 650-seat lounge-theatre with the aim to provide patrons with the best sounding showroom in Las Vegas. Designed to be a "Road House", Access Showroom is fully equipped to accommodate a range of touring performances from a DJ's chill and modern atmosphere to the highest impact rock concerts.

The venue is equipped with storage spaces and carts placed under the stage area. Lounge furniture and seats can be easily moved around and stored due to air cushions placed under the structures. The space can undergo complete turn-over in less than two hours.

Access Showroom was designed to offer the ultimate sensorial experience. A multimedia wonderland, the venue is equipped an astonishing sound reinforcement with over 35 cutting-edge speakers installed across the room. The lounge also features a centralized control interface managing multiple HD projections to create out of the ordinary imageries providing a unique immersive environment for the guest.
