Client	Unibail
Capacity	Large hall 437-2000 seats
	Small hall 100-500 seats
Area	9 357 m ²
Inauguration	2003

Paris Expo was designed to showcase the Espace Grande Arche, creating a warm and welcoming space that is also highly functional and flexible, the perfect venue for conferences, exhibitions, banquets and performances. The space offers all the technical infrastructures needed to provide a truly remarkable experience. Scéno Plus was primarily involved in creating the two main halls, service and traffic areas, the interior façade and the exterior totem display.

A complete review of the development plan led to the creation of a highly functional space, with better traffic flow and greatly improved reception and customer service areas.

The halls are fully equipped with all the necessary technical infrastructures (bridges, permanent control panels, movable tiers, audio/video and communications systems), providing top-notch professional services for visitors.

Sight lines and acoustics were completely revamped. All interior spaces and the interior façade were completely redesigned, creating an elegant and dynamic new look.

A new totem display was set up outside the Grande Arche.
