

PALAIS 12

BRUXELLES, BELGIUM

GENERAL INFORMATION

Client Foire internationale de
Bruxelles

Capacity 15000 seats

The City of Brussels wished to provide the capital with a multipurpose venue that could accommodate large-scale sporting events, but also concerts, conventions and other major shows. Located on the Heysel Plateau, Brussels Expo's Palais 12 is intended to be a federative project with an extraordinary economic, cultural and tourism development potential for the region. With its impressively large capacity, Palais 12's Hall can accommodate up to 15,000 people, making it a major focus for worldwide artist tours.

Depending on the number of seats on floor level, the stage position or the general admission places proportion, the total capacity can easily go from 5,000 to 15,000 spectators.

Extremely versatile, the room can quickly switch from a showroom to an entertainment facility through the use of a telescopic seating system allowing the addition of more than 2,700 seats. Spacious VIP areas were also added to the back of the removable rows to offer guests both the comfort and desired privacy.
